AB The invention relates to a method for labeling macromols. with a detectable marker which is encompassed in a layer of carbon, as well as a method for labeling biol. macromols. with such a marker. Disclosed is a method for labeling proteins in vivo with this marker, and a method for detecting fibrin clots using radionuclides contained inside a carbon cage. Preferably the radiolabel is ^{99m}Tc encapsulated inside the carbon in the form of a nano-encapsulate.
